Summary

A new Web Developer who is just starting out in the professional technology industry. I am looking for any opportunity to expand my skill range and become more knowledgeable in what ever relevant technologies are use in the present market. I am well versed in all manner of general web design, but would like to focus my efforts toward a singular tools that for specific projects.

Technical Skills

- **Languages**
Javascript, css, html,
- **Tools**
React.js, MySQL, Express.js, MongoDB/Mongoose,

Projects

Meal prep Scheduler/calender | <https://github.com/stephanfalcon/PlusUltraProject> | <https://stephanfalcon.github.io/PlusUltraProject/>

- Pulls from a public api to help find recipes and helps you plan out when to make them.
- I did a lot of the backend logic and api object manipulation with a bit of styling and formatting
- jQuery, bootstrap

Speakeasy | <https://github.com/cwp132/Speakeasy> | <https://speakeasydrinks.herokuapp.com/>

- Pulls from a drink api database to bring users unique drink recipes
- My role was more of the backend and working with express and react and getting the two to actually co-operate to for a cohesive app
- React.js, Express.js, Passport.js, Axios.js, Bootstrap

Education

University of Utah, Salt Lake City, UT - *Full Stack Web Development Certification*
