Projects

Time Clock App | https://github.com/stephanfalcon/TimeClock3|
https://timeclock03.herokuapp.com

- Allows users to clock-in and out like a time clock at work
- Users can add notes to times clocked in
- Uses mongodb and node api for routes and database querying

Speakeasy | https://github.com/cwp132/Speakeasy|
https://speakeasydrinks.herokuapp.com/

- Pulls from a drink API database to bring users unique drink recipes
- My role was more of the backend and working with express and react and getting the two to actually co-operate to for a cohesive app
- Technologies included: React.js, Express.js, Passport.js, Axios.js, Bootstrap
